### Exam Information

*These are self-study sessions.*

These specialty certifications are generally taken on a singular, as-needed basis. These sessions are self-study to accommodate personal schedules and study needs. Once an examinee is ready to take the exam, we will establish an exam date and location and order the exam. Please allow two to three weeks once the examinee indicates they are ready to take the test for exams to arrive.

**ACI Concrete Construction Special Inspector Certification Program**  
**CERTIFICATION CANDIDATE INFORMATION**

***What do I need to do to be certified as an ACI Concrete Construction Special Inspector?***

You need to complete the certification requirement for ACI Concrete Field Testing Technician—Grade I as described in the program policy for ACI Concrete Construction Special Inspector, successfully complete a written inspection examination, successfully complete a written plan reading examination, and supply evidence of education<sup>1</sup> and/or appropriate, verifiable (satisfactory) work experience<sup>2</sup>.

***How much education and/or work experience do I need for certification?***

You must meet one of the five following criteria for full inspector certification:

1. A B.S. degree in Civil Engineering, Civil Engineering Technology, Engineering Technology, Construction Engineering or Construction Engineering Technology from a program accredited by Accreditation Board for Engineering and Technology (ABET), **including** courses in concrete materials, design or construction<sup>1</sup>, **plus** six months satisfactory work experience<sup>2</sup>, or
2. A B.S. degree in an engineering program<sup>1</sup>, **plus** one year of satisfactory work experience<sup>2</sup>, or
3. A minimum of two years of college or technical school, earning at least 60 credit hours<sup>1</sup>, **plus** two years of satisfactory work experience<sup>2</sup>, or
4. A high school diploma, or equivalent<sup>1</sup>, **plus** a minimum of three years of satisfactory work experience<sup>2</sup>, or
5. Five years of satisfactory work experience<sup>2</sup>.

***How is the work experience verified?***

You complete form(s) describing the amount and range of your work experience, then send the form(s) to your former and/or present employer(s); these persons are called **RESPONDENTS**. After the Respondent(s) review the information you provide to them and complete their section of the form(s), they forward the form(s) directly to ACI for verification. ACI reviews/researches the information, including contacting the Respondent to verify that:

1. During the time period submitted, your employer/business worked on reinforced concrete construction projects.
2. The Respondent was in a position to have knowledge of your amount and range of reinforced concrete construction inspection-related work experience.
3. The form as received by ACI from the Respondent is accurate.

***What documents do I need?***

You need the **ACI Concrete Construction Special Inspector—Education/Work Experience Form**, *this Certification Candidate Information* sheet, and the INFORMATION FOR RESPONDENT

***What do I do with the forms?***

**Education/Work Experience Form:** Complete Sections A and B of the form and send with a copy of the INFORMATION FOR RESPONDENT to the Respondent. Send one set of these documents to as many Respondents as needed to prove the amount of work experience needed based on the amount of education you are submitting. **The Respondent completes Section C and returns the form directly to ACI in a sealed envelope.** Forms received directly from you (Applicant) may be invalidated and require resubmission.

---

<sup>1</sup> Copies of documents substantiating education requisites such as diplomas, certificates, and transcripts are required to be secured by you and submitted to ACI along with the Education/Work Experience Form for review and verification.

<sup>2</sup> Work experience must include decision-making responsibility and authority; verification of compliance with plans, specifications and codes; evaluation of concrete construction in the field; documentation and reporting of inspection results. Work experience must also include time spent inspecting the following areas of concrete construction in the field: formwork installation, reinforcements, embedments; sampling and testing of freshly mixed concrete; conveying, placing, consolidating, finishing, jointing; curing, protection, and formwork removal.

**ACI Concrete Construction Special Inspector Certification Program  
INFORMATION FOR RESPONDENT**

**A Candidate for ACI Concrete Construction Special Inspector Certification has requested that you review the accompanying form describing the Candidate's amount and range of reinforced concrete construction inspection-related work experience, complete the form, and send it directly to ACI.**

**WHAT THIS MEANS:** An individual who wishes to be certified as an ACI Concrete Construction Special Inspector must describe their experience on an ACI form. For certification as an ACI Concrete Construction Special Inspector, the statements made on this form must be corroborated or modified by a Respondent and submitted to ACI for review and verification. You have been selected as a Respondent because you have been identified as an individual having personal knowledge regarding the Candidate's work history.

**COMPLETING THE FORM**

**Education/Work Experience Form**

This form is used to indicate the candidate's previous work experience. Sections A and B should be already completed by the Candidate. You are being asked to review the form and complete Section C.

Note that, in Section B, Item 6, the percentage that is entered should reflect actual circumstances as closely as possible. This number is based on the idea that 100% is equal to 40 hours per week working solely on concrete inspection-related work. Lower percentages would apply if the average work week (over the time period in Section B, Item 5) was less than 40 hours; or, the candidate had divided job responsibilities between concrete inspection and non-concrete inspection-related work. Time-off during the period will lower the percentage. Overtime will increase the percentage. It is possible for the percentage to be either lower or higher than 100%.

*Example:* A candidate who had a mathematically averaged work week of 50 hours and who worked totally on concrete inspection would be given a rating of 125%. If the same candidate worked one half of his or her time on concrete inspection, the rating would be 63% (one-half of 125%).

If you feel the percentage given is not accurate in your judgment, or if any other information is deficient, please cross it out and write in your correction. Candidates are not penalized for having forms with information that has been modified by the Respondent, unless it is determined that intentional deception is involved.

**All information must be complete and legible – the supplied information must be adequate  
for ACI to contact you to verify the information provided on the form**

**DO NOT return the form to the Candidate!**

**Return the completed form directly to the American Concrete Institute in a sealed envelope to:**

American Concrete Institute  
Certification Processing  
38800 Country Club Drive  
Farmington Hills, MI 48331

**If you need any clarification regarding this process,  
please contact the ACI Certification Department at (248) 848-3790**

INSTRUCTIONS

Candidate completes ONLY Sections A and B, then forwards the entire form with the detailed instruction sheet to the Respondent who completes Section C and sends directly to ACI in a sealed envelope.
